Overall Opinion about the students with respect to following ticked subject you focused in the interview

22 responses

## Core Subject to be Focused on (Please Tick)

## Please give your Valuable suggestions,if any

20 responses

The concept knowledge of the students is excellent

improvement required in programming logic & understanding

one of your streams is BE IT which includes C programming for all 4 years. My suggestion is that you should introduce object-oriented programming also. Given 11 and 12th computer science students have C++ or Java

Stress should be given on practicality in industry

Most of them had a liking towards arts that's awesome

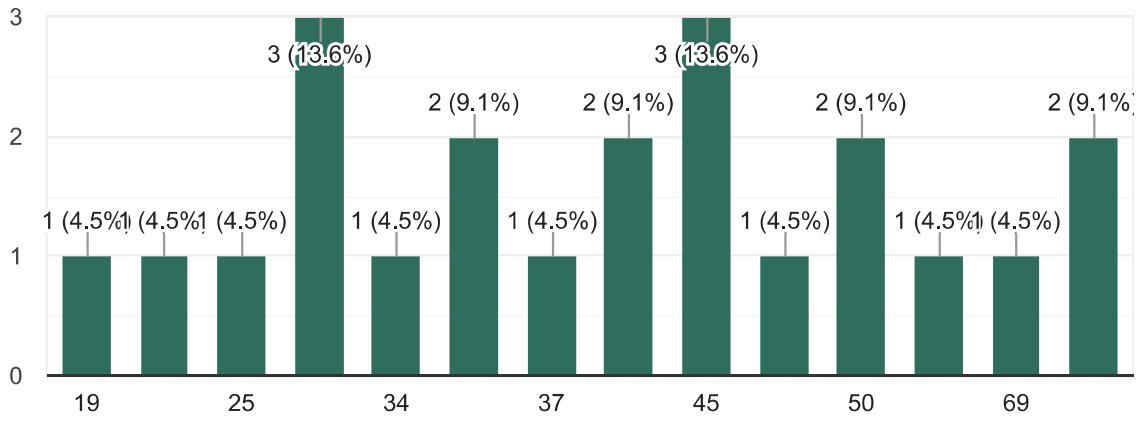

Improvement of communication skill required

Special emphasis to improve upon soft skills and through understanding of concepts and basic fundamentals. Effort should be made to include lots of practical exposure to students

\*\* This Feedback is based on number of students interviewed
