Resource Person

Session – Dr. Prakash Jadhav HOD Mechanical Engg. Dept. SRM University Andhra Pradesh (Co-owner of 5 Patents)

Day & Time – 10th June 2020 11 AM IST

Topic- Webinar on “Patents & Intellectual Property Rights”

The eminent speaker for the session on 10th June 2020 11 AM IST was **Dr. Prakash Jadhav** delivered the talk on very much informative topic “**Patents & Intellectual Property Rights**”. Warm Welcome of the session’s speaker is followed by the Introduction and highlighting achievements of speakers presented by Prof. Sneha S. Bhende. The resource person discussed various aspects related project management.

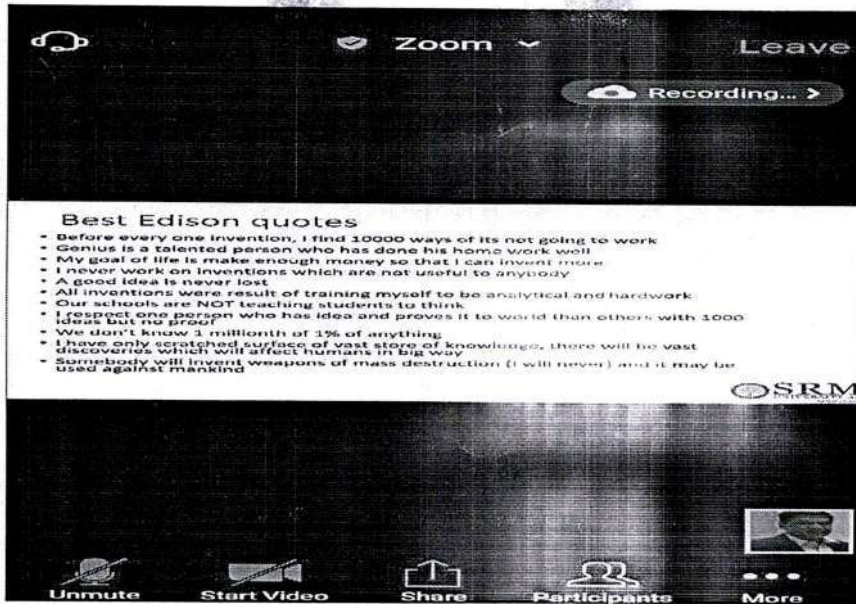

A patent is an intellectual property (IP) right for a technical invention. It allows you to prevent others from using your invention for commercial purposes for up to 20 years. You decide who is allowed to produce, sell or import your invention in those countries in which you own a valid patent. Patents only protect inventions that are novel and inventive at the time of applying for patent protection. However, these two requirements are not checked during the Swiss patent granting procedure. A patent is granted without a guarantee and can therefore be challenged by third parties. For this reason, it is essential that you clarify the novelty of your invention yourself via searches either before or after applying for a patent.

Intellectual property (IP) refers to creations of the mind, such as inventions; literary and artistic works; designs; and symbols, names and images used in commerce. IP is protected in law by, for example, patents, copyright and trademarks, which enable people to earn recognition or financial benefit from what they invent or create.

Types of intellectual property were discussed and how to protect patent were explained by speaker. Protection of Intellectual property rights and what is copyright also covered in the session. Few patents were shown in session and guidelines were really helpful how to file patent.
