The Sinhgad Group of Educational Institutes, spread over Maharashtra has presence to reckon with. The group is bench marked in every aspect. It struck its foundation in 1993 to transform the dream of its visionary architect Founder President Prof. M.N. Navale into a palpable reality. The entire Sinhgad Group has convincingly evolved into the most sought after education destination. Majority of the institutes are duly accredited by NAAC, approved by AICTE DTE and affiliated to Savitribai Phule Pune University, Solapur University & Mumbai University.

Sinhgad Technical Education Society (STES), RMDSTIC has set itself a vision "We are committed to produce not only good engineers but good human beings also". The Motivating environment in RMDSTIC for knowledge assimilation, generation and dissemination with a sense of social responsibility, human values and concern for social commitment has carved a niche for itself among the best technical institutes.

Global Research Conference Forum is an educational based wide spectrum that seeks to provide Scholars / Researchers / Academician / Scientists from across the Globe who are involved in collaboration with the international research community with the current development of expertise in theory and practise in all the area's of research.

Please join the world's foremost gathering of research scientists, educators and policymakers, to be held in Pune, on 25th & 26th March 2021.

Conference Topics :

1. RMDSTIC International Conference on General Science, IT, Civil, Computer Science, Electronics & Tele Communication, Mechanical Engg., Emerging Engineering Mech. & Technologies 2021
2. RMDSTIC International Conference on Management, Business, Economics and Sustainability 2021

Finally, on behalf of the Organizing Committee, we would like to invite all the Scientific Community to participate in the International Conference

Hearty Welcome!

We are ecstatic to host this International Conference on the prestigious grounds of RMD Sinhgad Technical Institutes, Warje, Pune, under the auspices of Sinhgad Technical Education Society (STES). Pune, Maharashtra's cultural capital, has received the moniker "Oxford of the East" for its long association with the fields of literature, architecture, theatre, technology, and other fields as a learning centre.

Taking the meeting forward, we will gather for debate at the Conference and drive our thinking machine, investigate and advance our thought machine, delving mainly into focussing on approaches and frontiers for long-term dilemmas and intelligent practises in the field of engineering technology and management.

Warm Greetings from Maharashtra's Cultural Capital "Pune"

Pune, also known as 'Poona,' is a city in the Indian state of Maharashtra. It is also known as the "Queen of the Deccan," and it rose to prominence in the 17th century as the capital of the Bhonsle Marathas. Pune, Maharashtra's second largest city, is known for its rich Maratha culture and well-established long history in production and processing. The city was once ruled by the Rashtrakutas, and Shivaji founded his empire from Pune.

Pune has one of the most pleasant climates in the world. It has a hot, semi-arid climate that makes it suitable for human habitation.

Pune is India's eighth most populous city. It has the country's sixth-highest per capita income. Information technology, manufacturing, and education are just a few of the industries that help to improve Pune's economy.

Some of the world's largest car firms are headquartered in Pune, India's Motor City. Greenfield facilities have been developed near Pune, Maharashtra, by Bajaj Auto, General Motors, Mercedes Benz, Volkswagen, and Force Motors.

In addition, the IT sector in Pune has largely emerged. The IT industry, which is important to Pune's economy, is attracting skilled professionals from all over the world. Several well-known IT companies, including Infosys, TCS, and Capgemini, IBM, Rockwell Automation, and Tech Mahindra, are headquartered in the area.

Pune, India's cultural capital is known as the "Oxford of the East" because of its extensive prestigious educational institutions and research centres. The city has grown into a major educational centre for the region.

Students and practitioners from all over the world are attracted to prestigious academic institutions in information technology, management, education, and training. Pune is home to nearly half of all international students in the region. Furthermore, several colleges in Pune have student exchange programmes with European colleges.

Conference Theme:

“Sustainable Challenges and Smart Practices in Engineering Technology & Management”

The Covid 19 pandemic, in addition to its effects on economies and trade operations, poses a number of problems for the engineering and technology industries, which may intensify depending on the scale and duration of the global crisis. The repercussions of Covid-19 are causing delays for technology companies and governments charged with commissioning programmes. The most noticeable implications are massive construction sites, putting subcontractors at risk of bankruptcy. Chain reaction has a compounding effect on oil refineries, energy-based companies, and chemical markets, which will almost certainly face immediate revenue declines. E&C companies will continue to face downward market pressure and supply chain issues. Many privately commissioned projects are caused to be postponed, resulting in cash flow issues and debt management concerns. This form of condition would almost certainly result in a rise in distressed company acquisitions. However, in most foreign countries, engineers have steered away from their professional body of work to help the medical front-liners to make face masks, shields, ventilator prototype, as engineers are central to a lot of such infrastructure.

In the technology industry, the situation is very similar, as Internet leverage is given to adapt the huge increase in the worldwide use of workstations for work from home, equipping them with the requisite infrastructure to triple or even quadruple the number of remote workers. The only assurance seems to be that the crisis is had a huge impact on the IT industry. Network-wide stress testing seems to be a foregone conclusion for the majority of companies and IT professionals who operate their networks. The Covid pandemic has hindered many organisations' ability to re-allocate resources to help staffs who are unable to operate outside their offices. Network Redundancy infrastructure solutions would have to face a constantly low-price reduction to a degree that even small enterprises can afford to take over. Businesses are gradually moving to co-working spaces in place of conventional office space, and introducing versatile technical standardised solutions. The new advancements in the field of artificial intelligence, with the current exposure being the method of Automation Marketing Software, which is likely to be implemented in a major way because it needs minimal maintenance and human intervention.

As a result, the apparent consequences have a lot of far-reaching long-term implications that no one expected.

The current financial crisis will pave the way for a completely new IT world. Start operating on the fact that governments and subcontractors could consider working closely together, as in the case of widened building shutdowns, reviewing cash operations, contemplating mergers and acquisitions, and analysing the cost of labour with contingency planning during decreased demand and operation, as examples of steps or interventions that might be considered to save the planet from a greater loss. Additionally, a stimulus plan may prevent a short-term upward ripple impact in the labour market.

The Covid-19 epidemic serves as a stark reminder that pandemics and other natural disasters will continue to occur in the future. We must be ready to mitigate their societal consequences. Coronavirus is having a major effect on industries and the economy, in addition to having serious health consequences. As the pandemic advances, there has never been a more urgent need for companies to reconsider and reconfigure their operations in order to adapt to a changing environment.

Now is the time for businesses to focus their efforts on supporting core elements of their operations that will help them stabilise in the new world and plan for the future. Any main areas to concentrate on will be designing incident response strategies specific to this crisis, as well as interacting efficiently with the workforce, protecting people, and so on. To reduce the ripple effects of Covid 19, to minimise supply chain distributions, to create an awareness of the tax, exchange, and regulatory processes, to manage the dynamics of funds, and, of course, to strategize brands through digital transformation.

Everyone here expresses sincere gratitude to those of you who have reached out to us in your own special way, no matter how big or small. All of you good people out there get a huge thumbs up for making the timely decision to attend this event. Thank you very much for your invaluable time, presence, and involvement, and particularly for being so gracious in receiving and accepting our generosity. Looking forward to your kind cooperation, enthusiastic engagement, and some feisty brainstorming from you illustrious gurus in order to make this virtual meet special and successful! An elated Thank you to everyone who is participating in this upcoming meet.

Before signing off, I would like to congratulate the entire team as well as our Advisory and Review Board Members. I am very certain and optimistic that they will put on a good show, so I congratulate them on their overall efforts.

Come! Connect! Contribute! Conquer!

Presentation Rooms

Due to current concerns on COVID-19 Pandemic Situation, the Committee has decided to withdraw the face-to-face presentation session for presenter category.

1. VIRTUALPRESENTATION
meet60.com: For real-time interaction between presenter and audience
2. ONLINE VIDEO PRESENTATION (NEW!!!) Now you can present your paper from the comfort of your home. Just send us your 10-15 minutes pre-recorded video presentation and slides. The video will be posted in our YouTube channel and Facebook page on the conference day. It saves time, money and more importantly, we stay safe. It's the New Normal!

Best Paper Award (Only for research scholars)

'Best Paper' is selected on the basis of a set of selected criteria. Reviewers' report is the key factor in selecting the best research papers.

Best Presenter Award Best

Presenter Awards will be presented only to research scholars (if there are sufficient numbers) who make outstanding presentations in each track which will be based on the recommendations of the Chair/Observers of the respective Technical Sessions.

Publication of your Paper

Selected Papers will be recommended for publication in SCOPUS Indexed Journals with additional fees and UGC care 1 listed journal Publication will be free for accepted papers.
