

STP IV Module 3 Technical Writing

Date – 08/04/2021 and 16/04/2021

Venue- Microsoft Teams Classroom

Aim: To develop effective technical writing skills and to motivate the students for technical publications.

Objective:

- To encourage the students for technical writing
- To motivate the students to write research papers and good technical content.
- To specifically focus on the research presentations on conferences and journals.
- To help the students for writing project thesis in proper technical writing.

Significance of STP IV Module 3

STP IV Module 3 Technical Writing demonstrates strategies aimed to improve active researchers in students, which proposed to increase students' academic achievement. STP-IV Module 3 Technical Writing, the technical fields demand technical language for the illustration of any project in industry. The Session has to be taken by the institute's expert faculty members.

A technical article is a piece, of around a subject that has as of late investigated or surveyed and composed by a master in that field. A research paper may offer a thesis, but it's not very in-depth. A technical article surveys a conceivable or current thought and composes almost the impacts.

About Technical Writing

This document describes several simple, concrete ways to improve your writing, by avoiding some common mistakes. The end of this document contains more resources for improving your writing.

Some people believe that writing papers, giving talks, and similar “marketing” activities are not part of research, but an adjunct to it or even an undesirable distraction. This view is inaccurate. The purpose of research is to increase the store of human knowledge, and so even the very best work is useless if you cannot effectively communicate it to the rest of the world. If a paper is poorly written, then readers might conclude you spent as little effort on the research that it describes.

Equally importantly, writing papers and giving talks will clarify your thinking and thereby improve your research. You may be surprised how difficult it is to clearly communicate your ideas and contributions; doing so will force you to understand them more deeply and enable you to improve them.

Writing style

Passive voice has no place in technical writing. It obscures who the actor was, what caused it, and when it happened. Use active voice and simple, clear, direct phrasing.

First person is rarely appropriate in technical writing.

- First person *is* appropriate when describing something that the author of the paper did manually. Recall that your paper should not be couched as a narrative.
- Do *not* use “we” to mean “the author and the reader” or “the paper”. For example, do not write “In this section, we ...”.
- Do *not* use “we” to describe the operation of a program or system. “We compute a graph” makes it sound like the authors did it by hand. As a related point, do not anthropomorphize computers: they *hate* it. Anthropomorphism, such as “the program thinks that ..”, is unclear and vague.

Avoid puffery, self-congratulation, superlatives, and subjective or value judgments: give the objective facts and let the reader judge. Avoid vague terms like “sizable” and “significant” (which are also subjective). Don't overuse the word “novel”.

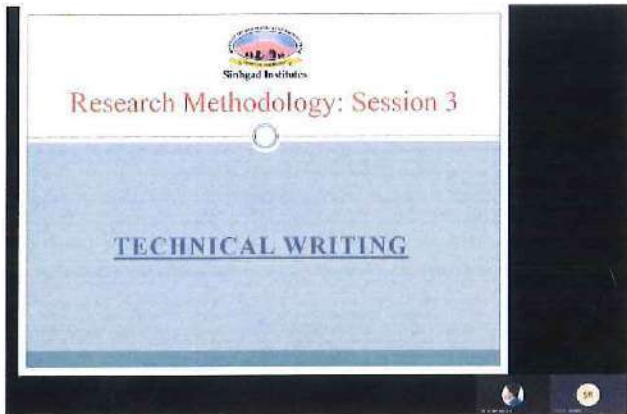

Outcome:

- **Students will be able to write the technical papers, journals and project thesis.**
- **Students will be able to give the best technical presentations.**
- **Good technical write ups will get awards in academics as well as on university level competitions**
- **Students will be able to improve the Writing skills along with research views by considering the recent innovations in technical fields.**

Conclusion:

“To enhance the quality of engineering students by empowering them with skills that are globally important, STP IV will be beneficial to students”.

STP-IV Activity Session Schedule**

All the students of TE Civil are hereby informed that, STP-IV sessions are scheduled as per following timetable for additional inputs and activities in all the modules of STP-IV. Attendance is mandatory. All the students should submit the activity assignments at the end of the session.

Module No.	Name of Module	Date of conduction	Time
1	Research Why & How	25/02/2021 04/03/2021	4:15 pm onwards
2	Literature Review	12/03/2021 25/03/2021	4:15 pm onwards
3	Technical Writing	08/04/2021 16/04/2021	4:15 pm onwards
